

Journal of the Lakehead Amateur Radio Club

Thunder Bay, Ontario

Volume 85

November 2019

Issue 9

Monthly meeting is this Thursday at 1900 hours in the 55 Plus Centre - 700 River St.

Coming up at this month's meeting:

John Plumridge VE3FMT will talk about the Maxx-track radio, a full band coverage synthesizer transceiver. After our social break we will get an update on the repeaters, and lots has been happening with ARES - Last week 7 municipalities across NW Ontario activated their EOCs and used amateur radio to communicate to each other. We also plan to talk about getting t-shirts and other items of clothing.

de VE3RRP

The beginning of the long dash:

Happy 80th anniversary to CBC Radio's longest running segment

In the 1930s, it helped sailors properly set their instruments for navigation. It allowed railway companies to be punctual, and helped Canadians set their watches with precision every day. To many, the National Research Council official time signal is a fixture of Canadian society. And on Nov. 5, the longest running segment on CBC Radio turns 80 years old.

THE NEW CYCLE HAS BEGUN!

Nov. 1, 2019: Breaking a string of 28 spotless days, a new sunspot (AR2750) is emerging in the sun's southern hemisphere—and it's a member of the next solar cycle. A picture of the sunspot is inset in this magnetic map of the sun's surface from NASA's Solar Dynamics Observatory:

ABOUT US

The Lakehead Amateur Radio Club (LARC) is an incorporated not for profit group of amateur radio operators in the Thunder Bay area that meet for self education, community service and fellowship. . Our postal address is 1100C Memorial Ave. Suite 184, Thunder Bay, Ontario P7B 4A3. This newsletter is published monthly except for July and August by Ed Baumann VE3SNW and questions and submissions may be emailed to hqnewsletter@gmail.com

Amethyst District ARES

Providing emergency communications for Northwestern Ontario

Emergency Coordinators

Atikokan: Warren Paulson, VE3FYN (ARES DEC, Amethyst District)

Sioux Narrows: Woody Linton, VE3JJA

Fort Frances: Rod Davis, VE3RYD (ARES EC, Fort Frances & area)

Kenora: Chris Bigelow, VA3ECO (ARES EC, Kenora & area)

Dryden: Bob Ernewein,, VE3YDN

Thunder Bay: Brad Harris, VE3MXJ (ARES EC, Thunder Bay & area)

Nets and Exercises

We conduct an open weekly HF net on 80 and 40 metres. The purpose of this net is to monitor regional propagation conditions, share information, and practice net procedures.

Time: Wednesdays at 21:30 UTC (4:30 pm EST, 3:30 pm CST)

Frequency: Primary 3.675 MHz LSB, Secondary 7.135 MHz LSB

Russian OTH Radar Now Reported to be “Everywhere”

11/12/2019 via ARRL

The latest International Amateur Radio Union Region 1 Monitoring System (IARUMS) newsletter reports the Russian “Contayner” over-the-horizon radar (OTHR) has been active in the 7, 10, 14, and 18 MHz amateur radio allocations (amateur radio is primary on 40 and 20 meters). The OTHR transmissions have been 40 sweeps/second, FM on pulse, and 12 kHz wide. Additionally, IARUMS reports a significant increase in Russian military traffic using F1B, PSK, and orthogonal frequency division multiplex (OFDM) on 40, 30, 20, and 15 meters.

Access to 60 Meters Continues to Expand

11/11/2019 via ARRL

According to the latest edition of The 5 MHz Newsletter, regulatory agencies in an expanding list of countries have granted amateur radio access to a 60-meter band.

A secondary allocation of 5.351.5 – 5.366.5 MHz was released to radio amateurs in Kuwait, where they will adhere to the World Radiocommunication Conference 2015 (WRC-15) allocation, permitting a maximum power of 15 W EIRP. Indonesian and Greek hams recently gained access to the same allocation.

Meanwhile, Israel has extended authorization of 5 MHz amateur permits to the end of December and added a Channel 0 to the existing eight channels, where hams may run 100 W PEP on several modes, depending upon the channel.

Still under discussion is ham radio access to a 5 MHz secondary band in Australia, where the band is used by some emergency services and law enforcement. Nearly 80 countries offer some level of amateur access to the 5 MHz band.

In the US, ARRL petitioned the FCC shortly after WRC-15 to allocate a secondary 60-meter band and to permit 100 W PEP, as already authorized on the existing channels there.

W1AW to Commemorate 98th Anniversary of First Amateur Radio Signals to Span the Atlantic

11/06/2019 via ARRL

December 11 marks the 98th anniversary of the success of ARRL’s Transatlantic Tests in 1921, organized to see if low-power amateur radio stations could be heard across the Atlantic using shortwave frequencies (i.e., above 200 meters). On that day, a message transmitted by a group of Radio Club of America members at 1BCG in Greenwich, Connecticut, was copied by Paul Godley, 2ZE, in Scotland.

While the first two-way contact would not take place until 1923, the 1921 transatlantic success marked the beginning of what would become routine communication between US radio amateurs and those in other parts of the world — literally the birth of DX.

To commemorate this amateur radio milestone, Maxim Memorial Station W1AW will be on the air through the day on December 11 with volunteer operators. The goal is to encourage contacts between radio amateurs in the US and Europe while showcasing the significance of the transmissions that pioneered global communication and laid the groundwork for technology widely used today. The event will run from 1300 until 0000 UTC. Some details are still being worked out, but operation will focus on 40 and 20 meters (SSB).

Contact Clark Burgard, N1BCG, for more information.
